

ICSE Previous Year Practice 2017 (2017)

Subject: General | Topic: Data Structures & Algorithms

1. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
2. What is the most accurate beginner-level explanation of linked lists? (variation 92)
3. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
4. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
5. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
6. What is the most accurate beginner-level explanation of linked lists? (variation 72)
7. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
8. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
9. What is the most accurate beginner-level explanation of recursion? (variation 87)
10. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
11. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
12. What is the most accurate beginner-level explanation of recursion?
13. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
14. What is the most accurate beginner-level explanation of recursion?
15. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
16. What is the most accurate beginner-level explanation of linked lists? (variation 92)
17. What is the most accurate beginner-level explanation of linked lists? (variation 102)

18. When working with Data Structures & Algorithms, why would a developer use binary search?
19. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
20. What is the most accurate beginner-level explanation of recursion? (variation 107)
21. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
22. What is the most accurate beginner-level explanation of linked lists? (variation 72)
23. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
24. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
25. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
26. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
27. What is the most accurate beginner-level explanation of linked lists?
28. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
29. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)
30. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
31. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
32. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
33. What is the most accurate beginner-level explanation of recursion? (variation 97)
34. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
35. What is the most accurate beginner-level explanation of linked lists?
36. When working with Data Structures & Algorithms, why would a developer use binary trees?

37. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
38. A student says 'queues' is not relevant to real projects. What is the best correction?
39. Which option is a correct use case for merge sort in Data Structures & Algorithms?
40. Which option is a correct use case for stacks in Data Structures & Algorithms?
41. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
42. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
43. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
44. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
45. Which statement best describes Big O notation in Data Structures & Algorithms?
46. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
47. What is the most accurate beginner-level explanation of recursion? (variation 77)
48. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
49. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
50. When working with Data Structures & Algorithms, why would a developer use binary search?
51. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
52. When working with Data Structures & Algorithms, why would a developer use binary search?
53. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
54. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
55. Which option is a correct use case for merge sort in Data Structures & Algorithms?

56. When working with Data Structures & Algorithms, why would a developer use binary trees?

57. Which statement best describes hash tables in Data Structures & Algorithms?

58. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

59. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

60. When working with Data Structures & Algorithms, why would a developer use binary search?
