

ICSE Previous Year Practice 2018 (2018)

Subject: General | Topic: Data Structures & Algorithms

1. Which statement best describes Big O notation in Data Structures & Algorithms?
2. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
3. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
4. What is the most accurate beginner-level explanation of linked lists?
5. What is the most accurate beginner-level explanation of recursion? (variation 97)
6. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)
7. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
8. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
9. Which statement best describes hash tables in Data Structures & Algorithms?
10. When working with Data Structures & Algorithms, why would a developer use binary search?
11. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
12. Which option is a correct use case for stacks in Data Structures & Algorithms?
13. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
14. What is the most accurate beginner-level explanation of recursion?
15. What is the most accurate beginner-level explanation of recursion? (variation 107)
16. When working with Data Structures & Algorithms, why would a developer use binary search?
17. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

18. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
19. What is the most accurate beginner-level explanation of linked lists? (variation 82)
20. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
21. What is the most accurate beginner-level explanation of linked lists?
22. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
23. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
24. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
25. What is the most accurate beginner-level explanation of linked lists? (variation 92)
26. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
27. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
28. When working with Data Structures & Algorithms, why would a developer use binary trees?
29. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
30. What is the most accurate beginner-level explanation of linked lists? (variation 92)
31. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
32. What is the most accurate beginner-level explanation of linked lists? (variation 102)
33. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
34. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
35. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
36. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)

37. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
38. Which statement best describes hash tables in Data Structures & Algorithms?
39. What is the most accurate beginner-level explanation of recursion? (variation 77)
40. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
41. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
42. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
43. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
44. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
45. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
46. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
47. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
48. When working with Data Structures & Algorithms, why would a developer use binary search?
49. What is the most accurate beginner-level explanation of linked lists?
50. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
51. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
52. Which statement best describes Big O notation in Data Structures & Algorithms?
53. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
54. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
55. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

56. What is the most accurate beginner-level explanation of linked lists? (variation 72)

57. What is the most accurate beginner-level explanation of linked lists? (variation 92)

58. A student says 'queues' is not relevant to real projects. What is the best correction?

59. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)

60. What is the most accurate beginner-level explanation of recursion? (variation 97)
