

ICSE Previous Year Practice 2021 (2021)

Subject: General | Topic: Data Structures & Algorithms

1. What is the most accurate beginner-level explanation of recursion?
2. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
3. What is the most accurate beginner-level explanation of linked lists? (variation 72)
4. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
5. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
6. What is the most accurate beginner-level explanation of recursion? (variation 97)
7. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
8. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
9. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
10. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
11. What is the most accurate beginner-level explanation of linked lists? (variation 92)
12. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
13. Which option is a correct use case for stacks in Data Structures & Algorithms?
14. What is the most accurate beginner-level explanation of recursion?
15. What is the most accurate beginner-level explanation of linked lists?
16. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
17. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)

18. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
19. A student says 'queues' is not relevant to real projects. What is the best correction?
20. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
21. What is the most accurate beginner-level explanation of linked lists? (variation 102)
22. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)
23. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
24. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
25. Which statement best describes hash tables in Data Structures & Algorithms?
26. A student says 'queues' is not relevant to real projects. What is the best correction?
27. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
28. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
29. What is the most accurate beginner-level explanation of linked lists? (variation 82)
30. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
31. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
32. When working with Data Structures & Algorithms, why would a developer use binary search?
33. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
34. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
35. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
36. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

37. Which statement best describes hash tables in Data Structures & Algorithms?
38. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
39. When working with Data Structures & Algorithms, why would a developer use binary search?
40. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
41. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
42. What is the most accurate beginner-level explanation of linked lists?
43. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
44. What is the most accurate beginner-level explanation of recursion?
45. What is the most accurate beginner-level explanation of linked lists? (variation 82)
46. What is the most accurate beginner-level explanation of linked lists? (variation 92)
47. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
48. When working with Data Structures & Algorithms, why would a developer use binary trees?
49. What is the most accurate beginner-level explanation of recursion? (variation 77)
50. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
51. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
52. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
53. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
54. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
55. What is the most accurate beginner-level explanation of recursion? (variation 97)

56. Which statement best describes Big O notation in Data Structures & Algorithms?

57. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

58. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)

59. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

60. When working with Data Structures & Algorithms, why would a developer use binary trees?
