

ICSE Previous Year Practice 2024 (2024)

Subject: General | Topic: Data Structures & Algorithms

1. Which option is a correct use case for merge sort in Data Structures & Algorithms?
2. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
3. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
4. What is the most accurate beginner-level explanation of linked lists? (variation 92)
5. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
6. What is the most accurate beginner-level explanation of linked lists? (variation 102)
7. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
8. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
9. When working with Data Structures & Algorithms, why would a developer use binary search?
10. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
11. Which statement best describes hash tables in Data Structures & Algorithms?
12. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
13. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)
14. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
15. What is the most accurate beginner-level explanation of linked lists?
16. Which option is a correct use case for merge sort in Data Structures & Algorithms?
17. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)

18. Which option is a correct use case for stacks in Data Structures & Algorithms?
19. What is the most accurate beginner-level explanation of recursion? (variation 77)
20. What is the most accurate beginner-level explanation of linked lists? (variation 102)
21. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
22. What is the most accurate beginner-level explanation of recursion?
23. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
24. Which statement best describes hash tables in Data Structures & Algorithms?
25. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
26. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
27. What is the most accurate beginner-level explanation of linked lists? (variation 92)
28. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
29. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
30. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
31. What is the most accurate beginner-level explanation of linked lists? (variation 72)
32. What is the most accurate beginner-level explanation of linked lists?
33. Which statement best describes Big O notation in Data Structures & Algorithms?
34. When working with Data Structures & Algorithms, why would a developer use binary search?
35. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
36. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)

37. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
38. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
39. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
40. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
41. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
42. What is the most accurate beginner-level explanation of linked lists? (variation 102)
43. What is the most accurate beginner-level explanation of linked lists? (variation 92)
44. When working with Data Structures & Algorithms, why would a developer use binary trees?
45. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
46. What is the most accurate beginner-level explanation of recursion?
47. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
48. When working with Data Structures & Algorithms, why would a developer use binary search?
49. What is the most accurate beginner-level explanation of recursion? (variation 87)
50. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
51. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
52. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
53. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
54. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
55. Which statement best describes hash tables in Data Structures & Algorithms?

56. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)

57. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

58. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

59. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

60. What is the most accurate beginner-level explanation of recursion? (variation 97)
