

ICSE Previous Year Practice 2025 (2025)

Subject: General | Topic: Data Structures & Algorithms

1. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
2. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
3. When working with Data Structures & Algorithms, why would a developer use binary search?
4. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
5. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
6. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
7. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
8. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
9. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
10. What is the most accurate beginner-level explanation of linked lists? (variation 72)
11. What is the most accurate beginner-level explanation of linked lists? (variation 102)
12. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
13. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
14. What is the most accurate beginner-level explanation of linked lists? (variation 82)
15. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
16. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
17. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

18. What is the most accurate beginner-level explanation of recursion?
19. Which statement best describes hash tables in Data Structures & Algorithms?
20. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
21. What is the most accurate beginner-level explanation of recursion? (variation 77)
22. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
23. What is the most accurate beginner-level explanation of recursion? (variation 97)
24. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
25. Which option is a correct use case for merge sort in Data Structures & Algorithms?
26. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
27. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
28. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
29. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
30. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
31. What is the most accurate beginner-level explanation of linked lists? (variation 82)
32. What is the most accurate beginner-level explanation of linked lists? (variation 92)
33. What is the most accurate beginner-level explanation of recursion?
34. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
35. When working with Data Structures & Algorithms, why would a developer use binary search?
36. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

37. A student says 'queues' is not relevant to real projects. What is the best correction?
38. What is the most accurate beginner-level explanation of linked lists?
39. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
40. When working with Data Structures & Algorithms, why would a developer use binary trees?
41. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
42. Which option is a correct use case for merge sort in Data Structures & Algorithms?
43. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
44. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
45. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
46. Which statement best describes Big O notation in Data Structures & Algorithms?
47. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
48. When working with Data Structures & Algorithms, why would a developer use binary search?
49. What is the most accurate beginner-level explanation of linked lists? (variation 72)
50. Which option is a correct use case for stacks in Data Structures & Algorithms?
51. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
52. What is the most accurate beginner-level explanation of recursion? (variation 97)
53. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
54. When working with Data Structures & Algorithms, why would a developer use binary search?
55. What is the most accurate beginner-level explanation of linked lists? (variation 102)

56. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)

57. Which statement best describes hash tables in Data Structures & Algorithms?

58. Which statement best describes hash tables in Data Structures & Algorithms?

59. What is the most accurate beginner-level explanation of recursion?

60. What is the most accurate beginner-level explanation of linked lists?
