

ICSE Previous Year Practice 2026 (2026)

Subject: General | Topic: Data Structures & Algorithms

1. What is the most accurate beginner-level explanation of linked lists? (variation 92)
2. What is the most accurate beginner-level explanation of recursion? (variation 87)
3. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
4. Which option is a correct use case for merge sort in Data Structures & Algorithms?
5. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
6. What is the most accurate beginner-level explanation of linked lists? (variation 102)
7. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
8. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
9. What is the most accurate beginner-level explanation of linked lists?
10. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
11. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
12. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
13. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
14. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
15. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
16. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
17. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

18. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
19. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
20. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
21. What is the most accurate beginner-level explanation of linked lists? (variation 92)
22. What is the most accurate beginner-level explanation of linked lists? (variation 72)
23. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
24. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
25. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
26. Which statement best describes hash tables in Data Structures & Algorithms?
27. What is the most accurate beginner-level explanation of linked lists?
28. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
29. When working with Data Structures & Algorithms, why would a developer use binary trees?
30. When working with Data Structures & Algorithms, why would a developer use binary trees?
31. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
32. Which statement best describes hash tables in Data Structures & Algorithms?
33. Which option is a correct use case for merge sort in Data Structures & Algorithms?
34. What is the most accurate beginner-level explanation of recursion?
35. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
36. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)

37. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
38. What is the most accurate beginner-level explanation of recursion? (variation 97)
39. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
40. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
41. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
42. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
43. What is the most accurate beginner-level explanation of linked lists? (variation 92)
44. What is the most accurate beginner-level explanation of linked lists? (variation 102)
45. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
46. What is the most accurate beginner-level explanation of linked lists?
47. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
48. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
49. Which statement best describes Big O notation in Data Structures & Algorithms?
50. What is the most accurate beginner-level explanation of linked lists? (variation 82)
51. When working with Data Structures & Algorithms, why would a developer use binary search?
52. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
53. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
54. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
55. Which statement best describes Big O notation in Data Structures & Algorithms?

56. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)

57. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

58. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)

59. What is the most accurate beginner-level explanation of recursion? (variation 77)

60. When working with Data Structures & Algorithms, why would a developer use binary search?
