

State Board Previous Year Practice 2017 (2017)

Subject: General | Topic: Data Structures & Algorithms

1. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
2. What is the most accurate beginner-level explanation of linked lists? (variation 92)
3. A student says 'queues' is not relevant to real projects. What is the best correction?
4. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
5. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
6. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
7. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
8. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
9. What is the most accurate beginner-level explanation of recursion? (variation 97)
10. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
11. Which statement best describes Big O notation in Data Structures & Algorithms?
12. Which option is a correct use case for stacks in Data Structures & Algorithms?
13. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
14. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
15. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
16. What is the most accurate beginner-level explanation of recursion?
17. What is the most accurate beginner-level explanation of linked lists? (variation 72)

18. What is the most accurate beginner-level explanation of linked lists? (variation 102)
19. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
20. When working with Data Structures & Algorithms, why would a developer use binary search?
21. What is the most accurate beginner-level explanation of linked lists? (variation 82)
22. When working with Data Structures & Algorithms, why would a developer use binary search?
23. When working with Data Structures & Algorithms, why would a developer use binary trees?
24. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
25. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)
26. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
27. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
28. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
29. What is the most accurate beginner-level explanation of recursion?
30. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
31. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
32. Which statement best describes hash tables in Data Structures & Algorithms?
33. What is the most accurate beginner-level explanation of recursion? (variation 97)
34. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
35. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
36. What is the most accurate beginner-level explanation of linked lists?

37. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
38. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
39. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
40. A student says 'queues' is not relevant to real projects. What is the best correction?
41. What is the most accurate beginner-level explanation of linked lists? (variation 102)
42. What is the most accurate beginner-level explanation of linked lists? (variation 92)
43. Which statement best describes Big O notation in Data Structures & Algorithms?
44. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
45. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
46. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
47. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
48. Which option is a correct use case for merge sort in Data Structures & Algorithms?
49. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
50. Which statement best describes hash tables in Data Structures & Algorithms?
51. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
52. What is the most accurate beginner-level explanation of linked lists?
53. When working with Data Structures & Algorithms, why would a developer use binary search?
54. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
55. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)

56. When working with Data Structures & Algorithms, why would a developer use binary trees?
57. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
58. What is the most accurate beginner-level explanation of recursion? (variation 77)
59. What is the most accurate beginner-level explanation of linked lists?
60. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
