

State Board Previous Year Practice 2018 (2018)

Subject: General | Topic: Data Structures & Algorithms

1. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
2. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
3. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
4. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
5. What is the most accurate beginner-level explanation of recursion? (variation 97)
6. What is the most accurate beginner-level explanation of linked lists? (variation 72)
7. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
8. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
9. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
10. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
11. What is the most accurate beginner-level explanation of recursion? (variation 87)
12. Which statement best describes Big O notation in Data Structures & Algorithms?
13. Which statement best describes Big O notation in Data Structures & Algorithms?
14. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
15. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
16. What is the most accurate beginner-level explanation of recursion?
17. What is the most accurate beginner-level explanation of recursion? (variation 77)

18. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
19. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
20. A student says 'queues' is not relevant to real projects. What is the best correction?
21. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)
22. When working with Data Structures & Algorithms, why would a developer use binary trees?
23. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
24. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
25. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
26. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
27. What is the most accurate beginner-level explanation of linked lists? (variation 102)
28. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
29. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
30. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
31. What is the most accurate beginner-level explanation of linked lists?
32. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
33. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
34. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
35. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
36. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)

37. Which statement best describes hash tables in Data Structures & Algorithms?
38. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
39. A student says 'queues' is not relevant to real projects. What is the best correction?
40. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
41. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
42. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
43. When working with Data Structures & Algorithms, why would a developer use binary search?
44. What is the most accurate beginner-level explanation of linked lists? (variation 82)
45. What is the most accurate beginner-level explanation of recursion?
46. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
47. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
48. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
49. Which statement best describes hash tables in Data Structures & Algorithms?
50. Which option is a correct use case for merge sort in Data Structures & Algorithms?
51. What is the most accurate beginner-level explanation of recursion?
52. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
53. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
54. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
55. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

56. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
57. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
58. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
59. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
60. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
