

State Board Previous Year Practice 2019 (2019)

Subject: General | Topic: Data Structures & Algorithms

1. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
2. Which option is a correct use case for stacks in Data Structures & Algorithms?
3. When working with Data Structures & Algorithms, why would a developer use binary search?
4. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
5. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
6. Which option is a correct use case for merge sort in Data Structures & Algorithms?
7. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
8. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
9. What is the most accurate beginner-level explanation of linked lists?
10. What is the most accurate beginner-level explanation of recursion? (variation 87)
11. Which statement best describes Big O notation in Data Structures & Algorithms?
12. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
13. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
14. What is the most accurate beginner-level explanation of linked lists? (variation 82)
15. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
16. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
17. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)

18. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
19. What is the most accurate beginner-level explanation of recursion? (variation 97)
20. What is the most accurate beginner-level explanation of recursion?
21. Which statement best describes hash tables in Data Structures & Algorithms?
22. What is the most accurate beginner-level explanation of linked lists? (variation 102)
23. When working with Data Structures & Algorithms, why would a developer use binary trees?
24. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
25. Which option is a correct use case for merge sort in Data Structures & Algorithms?
26. What is the most accurate beginner-level explanation of linked lists? (variation 102)
27. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
28. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
29. What is the most accurate beginner-level explanation of recursion?
30. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
31. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
32. What is the most accurate beginner-level explanation of recursion? (variation 107)
33. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
34. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
35. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
36. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)

37. When working with Data Structures & Algorithms, why would a developer use binary search?
38. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
39. When working with Data Structures & Algorithms, why would a developer use binary trees?
40. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
41. What is the most accurate beginner-level explanation of linked lists? (variation 92)
42. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
43. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
44. What is the most accurate beginner-level explanation of recursion? (variation 97)
45. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
46. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
47. A student says 'queues' is not relevant to real projects. What is the best correction?
48. When working with Data Structures & Algorithms, why would a developer use binary search?
49. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
50. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
51. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
52. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
53. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
54. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
55. What is the most accurate beginner-level explanation of linked lists? (variation 82)

56. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
57. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
58. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
59. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
60. What is the most accurate beginner-level explanation of linked lists? (variation 72)
