

State Board Previous Year Practice 2020 (2020)

Subject: General | Topic: Data Structures & Algorithms

1. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
2. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
3. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
4. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
5. Which statement best describes hash tables in Data Structures & Algorithms?
6. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
7. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
8. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
9. A student says 'queues' is not relevant to real projects. What is the best correction?
10. Which statement best describes hash tables in Data Structures & Algorithms?
11. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
12. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
13. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
14. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
15. What is the most accurate beginner-level explanation of linked lists? (variation 72)
16. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
17. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

18. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
19. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
20. What is the most accurate beginner-level explanation of recursion? (variation 97)
21. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
22. What is the most accurate beginner-level explanation of recursion?
23. What is the most accurate beginner-level explanation of recursion?
24. Which option is a correct use case for stacks in Data Structures & Algorithms?
25. What is the most accurate beginner-level explanation of linked lists?
26. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
27. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
28. When working with Data Structures & Algorithms, why would a developer use binary search?
29. What is the most accurate beginner-level explanation of linked lists? (variation 102)
30. What is the most accurate beginner-level explanation of recursion?
31. Which statement best describes Big O notation in Data Structures & Algorithms?
32. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
33. What is the most accurate beginner-level explanation of linked lists? (variation 102)
34. Which option is a correct use case for merge sort in Data Structures & Algorithms?
35. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
36. What is the most accurate beginner-level explanation of recursion? (variation 107)

37. When working with Data Structures & Algorithms, why would a developer use binary trees?
38. What is the most accurate beginner-level explanation of linked lists? (variation 102)
39. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
40. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
41. When working with Data Structures & Algorithms, why would a developer use binary trees?
42. What is the most accurate beginner-level explanation of linked lists? (variation 82)
43. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
44. What is the most accurate beginner-level explanation of linked lists?
45. What is the most accurate beginner-level explanation of linked lists? (variation 82)
46. What is the most accurate beginner-level explanation of recursion? (variation 87)
47. What is the most accurate beginner-level explanation of recursion? (variation 77)
48. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
49. What is the most accurate beginner-level explanation of linked lists? (variation 92)
50. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
51. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
52. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
53. What is the most accurate beginner-level explanation of linked lists? (variation 92)
54. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
55. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

56. What is the most accurate beginner-level explanation of linked lists? (variation 92)

57. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

58. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)

59. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

60. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
