

State Board Previous Year Practice 2023 (2023)

Subject: General | Topic: Data Structures & Algorithms

1. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
2. Which statement best describes hash tables in Data Structures & Algorithms?
3. When working with Data Structures & Algorithms, why would a developer use binary search?
4. What is the most accurate beginner-level explanation of recursion?
5. What is the most accurate beginner-level explanation of linked lists? (variation 82)
6. What is the most accurate beginner-level explanation of linked lists?
7. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
8. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
9. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
10. What is the most accurate beginner-level explanation of recursion?
11. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
12. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
13. What is the most accurate beginner-level explanation of linked lists? (variation 72)
14. What is the most accurate beginner-level explanation of linked lists? (variation 102)
15. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
16. When working with Data Structures & Algorithms, why would a developer use binary search?
17. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

18. What is the most accurate beginner-level explanation of recursion? (variation 97)
19. What is the most accurate beginner-level explanation of recursion?
20. Which statement best describes hash tables in Data Structures & Algorithms?
21. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
22. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
23. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
24. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
25. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
26. What is the most accurate beginner-level explanation of linked lists? (variation 92)
27. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
28. What is the most accurate beginner-level explanation of linked lists?
29. Which option is a correct use case for stacks in Data Structures & Algorithms?
30. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
31. What is the most accurate beginner-level explanation of linked lists? (variation 92)
32. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
33. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
34. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)
35. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
36. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

37. What is the most accurate beginner-level explanation of recursion? (variation 107)
38. Which statement best describes Big O notation in Data Structures & Algorithms?
39. Which statement best describes Big O notation in Data Structures & Algorithms?
40. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
41. What is the most accurate beginner-level explanation of linked lists? (variation 92)
42. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
43. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
44. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
45. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
46. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
47. What is the most accurate beginner-level explanation of linked lists? (variation 82)
48. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
49. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
50. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
51. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
52. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
53. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
54. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
55. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

56. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

57. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)

58. What is the most accurate beginner-level explanation of recursion? (variation 97)

59. Which option is a correct use case for merge sort in Data Structures & Algorithms?

60. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
