

State Board Previous Year Practice 2025 (2025)

Subject: General | Topic: Data Structures & Algorithms

1. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
2. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
3. Which option is a correct use case for merge sort in Data Structures & Algorithms?
4. What is the most accurate beginner-level explanation of linked lists? (variation 92)
5. When working with Data Structures & Algorithms, why would a developer use binary search?
6. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
7. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
8. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
9. What is the most accurate beginner-level explanation of recursion? (variation 87)
10. When working with Data Structures & Algorithms, why would a developer use binary trees?
11. What is the most accurate beginner-level explanation of recursion? (variation 97)
12. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
13. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
14. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
15. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
16. What is the most accurate beginner-level explanation of recursion? (variation 97)
17. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)

18. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
19. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
20. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
21. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
22. What is the most accurate beginner-level explanation of linked lists?
23. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
24. What is the most accurate beginner-level explanation of recursion? (variation 77)
25. Which statement best describes hash tables in Data Structures & Algorithms?
26. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
27. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
28. Which statement best describes hash tables in Data Structures & Algorithms?
29. What is the most accurate beginner-level explanation of recursion?
30. What is the most accurate beginner-level explanation of linked lists? (variation 82)
31. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
32. What is the most accurate beginner-level explanation of linked lists? (variation 92)
33. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
34. A student says 'queues' is not relevant to real projects. What is the best correction?
35. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
36. Which option is a correct use case for stacks in Data Structures & Algorithms?

37. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
38. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
39. Which option is a correct use case for merge sort in Data Structures & Algorithms?
40. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
41. A student says 'queues' is not relevant to real projects. What is the best correction?
42. When working with Data Structures & Algorithms, why would a developer use binary trees?
43. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
44. Which statement best describes Big O notation in Data Structures & Algorithms?
45. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
46. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
47. What is the most accurate beginner-level explanation of linked lists? (variation 102)
48. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
49. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
50. What is the most accurate beginner-level explanation of linked lists?
51. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
52. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
53. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
54. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
55. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

56. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)

57. Which statement best describes hash tables in Data Structures & Algorithms?

58. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

59. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

60. What is the most accurate beginner-level explanation of linked lists? (variation 102)
