

State Board Previous Year Practice 2026 (2026)

Subject: General | Topic: Data Structures & Algorithms

1. Which option is a correct use case for merge sort in Data Structures & Algorithms?
2. What is the most accurate beginner-level explanation of recursion?
3. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
4. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
5. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
6. What is the most accurate beginner-level explanation of linked lists? (variation 92)
7. When working with Data Structures & Algorithms, why would a developer use binary search?
8. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
9. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
10. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
11. Which statement best describes Big O notation in Data Structures & Algorithms?
12. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
13. What is the most accurate beginner-level explanation of linked lists? (variation 82)
14. What is the most accurate beginner-level explanation of linked lists? (variation 102)
15. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
16. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
17. What is the most accurate beginner-level explanation of linked lists? (variation 102)

18. When working with Data Structures & Algorithms, why would a developer use binary search?
19. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
20. A student says 'queues' is not relevant to real projects. What is the best correction?
21. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
22. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
23. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
24. Which option is a correct use case for stacks in Data Structures & Algorithms?
25. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
26. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
27. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
28. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
29. What is the most accurate beginner-level explanation of linked lists? (variation 72)
30. What is the most accurate beginner-level explanation of recursion?
31. What is the most accurate beginner-level explanation of recursion? (variation 107)
32. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
33. Which option is a correct use case for merge sort in Data Structures & Algorithms?
34. What is the most accurate beginner-level explanation of linked lists? (variation 92)
35. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
36. What is the most accurate beginner-level explanation of linked lists?

37. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
38. What is the most accurate beginner-level explanation of linked lists? (variation 92)
39. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
40. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
41. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
42. When working with Data Structures & Algorithms, why would a developer use binary search?
43. What is the most accurate beginner-level explanation of recursion? (variation 77)
44. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
45. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
46. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
47. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
48. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
49. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
50. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
51. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
52. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
53. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
54. What is the most accurate beginner-level explanation of recursion? (variation 97)
55. When working with Data Structures & Algorithms, why would a developer use binary trees?

56. When working with Data Structures & Algorithms, why would a developer use binary search?
57. What is the most accurate beginner-level explanation of linked lists? (variation 82)
58. What is the most accurate beginner-level explanation of recursion? (variation 97)
59. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
60. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
