

IIT-JEE Previous Year Practice 2017 (2017)

Subject: General | Topic: Data Structures & Algorithms

1. What is the most accurate beginner-level explanation of linked lists?
2. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
3. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
4. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
5. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
6. What is the most accurate beginner-level explanation of linked lists? (variation 102)
7. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
8. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
9. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
10. When working with Data Structures & Algorithms, why would a developer use binary search?
11. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
12. Which statement best describes hash tables in Data Structures & Algorithms?
13. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
14. What is the most accurate beginner-level explanation of linked lists? (variation 92)
15. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
16. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
17. A student says 'queues' is not relevant to real projects. What is the best correction?

18. What is the most accurate beginner-level explanation of linked lists? (variation 102)
19. Which statement best describes Big O notation in Data Structures & Algorithms?
20. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
21. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
22. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
23. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
24. What is the most accurate beginner-level explanation of recursion? (variation 97)
25. What is the most accurate beginner-level explanation of recursion? (variation 77)
26. When working with Data Structures & Algorithms, why would a developer use binary search?
27. What is the most accurate beginner-level explanation of recursion? (variation 107)
28. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
29. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
30. What is the most accurate beginner-level explanation of recursion?
31. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
32. What is the most accurate beginner-level explanation of recursion? (variation 97)
33. What is the most accurate beginner-level explanation of recursion? (variation 87)
34. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
35. A student says 'queues' is not relevant to real projects. What is the best correction?
36. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)

37. When working with Data Structures & Algorithms, why would a developer use binary search?
38. Which statement best describes Big O notation in Data Structures & Algorithms?
39. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
40. Which option is a correct use case for merge sort in Data Structures & Algorithms?
41. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
42. What is the most accurate beginner-level explanation of recursion?
43. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
44. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
45. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
46. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
47. Which option is a correct use case for merge sort in Data Structures & Algorithms?
48. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
49. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
50. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
51. What is the most accurate beginner-level explanation of linked lists?
52. Which statement best describes hash tables in Data Structures & Algorithms?
53. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)
54. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
55. What is the most accurate beginner-level explanation of linked lists? (variation 72)

56. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

57. Which statement best describes hash tables in Data Structures & Algorithms?

58. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

59. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

60. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
