

IIT-JEE Previous Year Practice 2019 (2019)

Subject: General | Topic: Data Structures & Algorithms

1. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
2. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
3. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
4. Which option is a correct use case for merge sort in Data Structures & Algorithms?
5. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
6. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
7. What is the most accurate beginner-level explanation of recursion? (variation 97)
8. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
9. What is the most accurate beginner-level explanation of recursion? (variation 107)
10. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
11. What is the most accurate beginner-level explanation of recursion? (variation 87)
12. What is the most accurate beginner-level explanation of recursion? (variation 97)
13. When working with Data Structures & Algorithms, why would a developer use binary trees?
14. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
15. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
16. What is the most accurate beginner-level explanation of linked lists? (variation 72)
17. What is the most accurate beginner-level explanation of linked lists? (variation 92)

18. What is the most accurate beginner-level explanation of recursion?
19. What is the most accurate beginner-level explanation of recursion?
20. What is the most accurate beginner-level explanation of linked lists?
21. What is the most accurate beginner-level explanation of recursion?
22. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
23. What is the most accurate beginner-level explanation of linked lists? (variation 82)
24. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
25. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
26. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
27. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
28. When working with Data Structures & Algorithms, why would a developer use binary search?
29. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
30. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
31. What is the most accurate beginner-level explanation of linked lists? (variation 92)
32. Which option is a correct use case for merge sort in Data Structures & Algorithms?
33. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
34. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
35. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
36. Which statement best describes hash tables in Data Structures & Algorithms?

37. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
38. Which statement best describes Big O notation in Data Structures & Algorithms?
39. What is the most accurate beginner-level explanation of linked lists? (variation 102)
40. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
41. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
42. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
43. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
44. What is the most accurate beginner-level explanation of linked lists?
45. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
46. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
47. What is the most accurate beginner-level explanation of linked lists? (variation 72)
48. A student says 'queues' is not relevant to real projects. What is the best correction?
49. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
50. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
51. Which statement best describes hash tables in Data Structures & Algorithms?
52. What is the most accurate beginner-level explanation of linked lists? (variation 102)
53. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
54. When working with Data Structures & Algorithms, why would a developer use binary search?
55. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)

56. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
57. Which option is a correct use case for stacks in Data Structures & Algorithms?
58. A student says 'queues' is not relevant to real projects. What is the best correction?
59. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
60. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
