

IIT-JEE Previous Year Practice 2020 (2020)

Subject: General | Topic: Data Structures & Algorithms

1. What is the most accurate beginner-level explanation of linked lists? (variation 92)
2. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
3. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
4. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
5. Which option is a correct use case for merge sort in Data Structures & Algorithms?
6. What is the most accurate beginner-level explanation of linked lists? (variation 102)
7. What is the most accurate beginner-level explanation of recursion? (variation 87)
8. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
9. What is the most accurate beginner-level explanation of linked lists? (variation 92)
10. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
11. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
12. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
13. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
14. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
15. When working with Data Structures & Algorithms, why would a developer use binary search?
16. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
17. What is the most accurate beginner-level explanation of linked lists? (variation 72)

18. What is the most accurate beginner-level explanation of linked lists? (variation 82)
19. What is the most accurate beginner-level explanation of linked lists?
20. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
21. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
22. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
23. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
24. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
25. What is the most accurate beginner-level explanation of recursion?
26. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
27. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
28. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
29. When working with Data Structures & Algorithms, why would a developer use binary trees?
30. When working with Data Structures & Algorithms, why would a developer use binary search?
31. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
32. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
33. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
34. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
35. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
36. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

37. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
38. What is the most accurate beginner-level explanation of recursion? (variation 107)
39. When working with Data Structures & Algorithms, why would a developer use binary search?
40. Which option is a correct use case for merge sort in Data Structures & Algorithms?
41. What is the most accurate beginner-level explanation of linked lists? (variation 102)
42. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
43. What is the most accurate beginner-level explanation of recursion?
44. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
45. What is the most accurate beginner-level explanation of linked lists?
46. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
47. Which statement best describes hash tables in Data Structures & Algorithms?
48. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
49. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
50. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
51. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
52. What is the most accurate beginner-level explanation of linked lists? (variation 92)
53. What is the most accurate beginner-level explanation of recursion? (variation 97)
54. A student says 'queues' is not relevant to real projects. What is the best correction?
55. Which statement best describes Big O notation in Data Structures & Algorithms?

56. Which option is a correct use case for stacks in Data Structures & Algorithms?
57. Which statement best describes Big O notation in Data Structures & Algorithms?
58. Which statement best describes hash tables in Data Structures & Algorithms?
59. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
60. What is the most accurate beginner-level explanation of recursion?
