

IIT-JEE Previous Year Practice 2021 (2021)

Subject: General | Topic: Data Structures & Algorithms

1. What is the most accurate beginner-level explanation of recursion? (variation 97)
2. Which option is a correct use case for stacks in Data Structures & Algorithms?
3. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
4. What is the most accurate beginner-level explanation of recursion?
5. What is the most accurate beginner-level explanation of recursion?
6. What is the most accurate beginner-level explanation of recursion? (variation 87)
7. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
8. Which statement best describes Big O notation in Data Structures & Algorithms?
9. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
10. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
11. Which statement best describes hash tables in Data Structures & Algorithms?
12. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
13. What is the most accurate beginner-level explanation of linked lists? (variation 102)
14. What is the most accurate beginner-level explanation of recursion? (variation 97)
15. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
16. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
17. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

18. Which option is a correct use case for merge sort in Data Structures & Algorithms?
19. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
20. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
21. What is the most accurate beginner-level explanation of linked lists? (variation 72)
22. What is the most accurate beginner-level explanation of linked lists?
23. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
24. What is the most accurate beginner-level explanation of linked lists? (variation 72)
25. What is the most accurate beginner-level explanation of linked lists?
26. What is the most accurate beginner-level explanation of recursion? (variation 107)
27. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
28. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
29. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
30. What is the most accurate beginner-level explanation of linked lists?
31. What is the most accurate beginner-level explanation of linked lists? (variation 82)
32. What is the most accurate beginner-level explanation of linked lists? (variation 102)
33. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
34. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
35. What is the most accurate beginner-level explanation of linked lists? (variation 82)
36. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

37. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
38. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
39. A student says 'queues' is not relevant to real projects. What is the best correction?
40. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
41. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)
42. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
43. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
44. When working with Data Structures & Algorithms, why would a developer use binary trees?
45. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
46. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
47. What is the most accurate beginner-level explanation of linked lists? (variation 92)
48. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
49. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
50. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
51. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
52. What is the most accurate beginner-level explanation of recursion?
53. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
54. When working with Data Structures & Algorithms, why would a developer use binary search?
55. Which statement best describes Big O notation in Data Structures & Algorithms?

56. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)

57. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)

58. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

59. A student says 'queues' is not relevant to real projects. What is the best correction?

60. Which option is a correct use case for merge sort in Data Structures & Algorithms?
