

IIT-JEE Previous Year Practice 2022 (2022)

Subject: General | Topic: Data Structures & Algorithms

1. What is the most accurate beginner-level explanation of linked lists? (variation 92)
2. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
3. What is the most accurate beginner-level explanation of recursion? (variation 107)
4. When working with Data Structures & Algorithms, why would a developer use binary search?
5. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
6. When working with Data Structures & Algorithms, why would a developer use binary search?
7. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
8. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
9. What is the most accurate beginner-level explanation of linked lists? (variation 82)
10. What is the most accurate beginner-level explanation of recursion?
11. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
12. What is the most accurate beginner-level explanation of linked lists? (variation 102)
13. A student says 'queues' is not relevant to real projects. What is the best correction?
14. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
15. What is the most accurate beginner-level explanation of linked lists? (variation 82)
16. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
17. When working with Data Structures & Algorithms, why would a developer use binary search?

18. What is the most accurate beginner-level explanation of linked lists?
19. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
20. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
21. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
22. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
23. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
24. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
25. When working with Data Structures & Algorithms, why would a developer use binary trees?
26. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)
27. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
28. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
29. What is the most accurate beginner-level explanation of recursion? (variation 87)
30. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
31. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
32. What is the most accurate beginner-level explanation of linked lists? (variation 92)
33. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
34. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
35. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
36. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

37. Which option is a correct use case for merge sort in Data Structures & Algorithms?
38. What is the most accurate beginner-level explanation of recursion? (variation 77)
39. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
40. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
41. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
42. Which statement best describes Big O notation in Data Structures & Algorithms?
43. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
44. Which statement best describes hash tables in Data Structures & Algorithms?
45. What is the most accurate beginner-level explanation of linked lists?
46. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
47. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
48. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
49. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
50. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
51. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
52. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
53. When working with Data Structures & Algorithms, why would a developer use binary trees?
54. Which statement best describes hash tables in Data Structures & Algorithms?
55. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

56. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)

57. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

58. What is the most accurate beginner-level explanation of linked lists? (variation 92)

59. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

60. What is the most accurate beginner-level explanation of linked lists? (variation 72)
