

IIT-JEE Previous Year Practice 2023 (2023)

Subject: General | Topic: Data Structures & Algorithms

1. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
2. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
3. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
4. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
5. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
6. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
7. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
8. What is the most accurate beginner-level explanation of linked lists?
9. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
10. What is the most accurate beginner-level explanation of linked lists? (variation 92)
11. A student says 'queues' is not relevant to real projects. What is the best correction?
12. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
13. What is the most accurate beginner-level explanation of recursion?
14. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
15. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
16. What is the most accurate beginner-level explanation of linked lists? (variation 82)
17. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)

18. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
19. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
20. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
21. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
22. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
23. What is the most accurate beginner-level explanation of linked lists? (variation 92)
24. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
25. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
26. What is the most accurate beginner-level explanation of recursion?
27. When working with Data Structures & Algorithms, why would a developer use binary search?
28. Which statement best describes hash tables in Data Structures & Algorithms?
29. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
30. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
31. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
32. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
33. What is the most accurate beginner-level explanation of linked lists? (variation 92)
34. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
35. Which statement best describes hash tables in Data Structures & Algorithms?
36. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)

37. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
38. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
39. What is the most accurate beginner-level explanation of recursion?
40. What is the most accurate beginner-level explanation of linked lists?
41. Which option is a correct use case for merge sort in Data Structures & Algorithms?
42. Which statement best describes Big O notation in Data Structures & Algorithms?
43. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
44. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
45. What is the most accurate beginner-level explanation of recursion? (variation 97)
46. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
47. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
48. When working with Data Structures & Algorithms, why would a developer use binary search?
49. A student says 'queues' is not relevant to real projects. What is the best correction?
50. What is the most accurate beginner-level explanation of linked lists? (variation 102)
51. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
52. What is the most accurate beginner-level explanation of linked lists? (variation 72)
53. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
54. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
55. Which statement best describes Big O notation in Data Structures & Algorithms?

56. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)

57. What is the most accurate beginner-level explanation of linked lists? (variation 102)

58. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

59. Which option is a correct use case for merge sort in Data Structures & Algorithms?

60. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
