

NEET Previous Year Practice 2018 (2018)

Subject: General | Topic: Data Structures & Algorithms

1. What is the most accurate beginner-level explanation of linked lists? (variation 82)
2. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
3. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
4. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
5. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
6. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
7. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
8. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
9. When working with Data Structures & Algorithms, why would a developer use binary search?
10. What is the most accurate beginner-level explanation of linked lists? (variation 72)
11. What is the most accurate beginner-level explanation of linked lists? (variation 102)
12. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
13. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
14. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
15. When working with Data Structures & Algorithms, why would a developer use binary search?
16. What is the most accurate beginner-level explanation of recursion?
17. What is the most accurate beginner-level explanation of recursion? (variation 87)

18. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
19. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
20. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
21. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
22. What is the most accurate beginner-level explanation of recursion? (variation 97)
23. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
24. What is the most accurate beginner-level explanation of linked lists? (variation 82)
25. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
26. What is the most accurate beginner-level explanation of linked lists?
27. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
28. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
29. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
30. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
31. When working with Data Structures & Algorithms, why would a developer use binary trees?
32. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
33. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
34. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
35. What is the most accurate beginner-level explanation of recursion? (variation 97)
36. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

37. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
38. What is the most accurate beginner-level explanation of linked lists?
39. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
40. Which option is a correct use case for stacks in Data Structures & Algorithms?
41. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
42. When working with Data Structures & Algorithms, why would a developer use binary search?
43. What is the most accurate beginner-level explanation of linked lists? (variation 92)
44. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
45. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
46. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
47. Which statement best describes hash tables in Data Structures & Algorithms?
48. Which option is a correct use case for merge sort in Data Structures & Algorithms?
49. What is the most accurate beginner-level explanation of recursion? (variation 77)
50. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
51. Which statement best describes Big O notation in Data Structures & Algorithms?
52. When working with Data Structures & Algorithms, why would a developer use binary search?
53. What is the most accurate beginner-level explanation of recursion?
54. What is the most accurate beginner-level explanation of linked lists? (variation 72)
55. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

56. What is the most accurate beginner-level explanation of linked lists? (variation 102)

57. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

58. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

59. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

60. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
