

# NEET Previous Year Practice 2020 (2020)

Subject: General | Topic: Data Structures & Algorithms

1. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
2. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
3. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
4. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
5. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
6. What is the most accurate beginner-level explanation of linked lists? (variation 82)
7. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
8. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
9. Which statement best describes hash tables in Data Structures & Algorithms?
10. What is the most accurate beginner-level explanation of recursion? (variation 107)
11. What is the most accurate beginner-level explanation of recursion?
12. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
13. When working with Data Structures & Algorithms, why would a developer use binary trees?
14. What is the most accurate beginner-level explanation of linked lists?
15. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
16. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
17. What is the most accurate beginner-level explanation of linked lists? (variation 102)

18. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
19. What is the most accurate beginner-level explanation of recursion? (variation 77)
20. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
21. Which option is a correct use case for stacks in Data Structures & Algorithms?
22. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
23. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
24. When working with Data Structures & Algorithms, why would a developer use binary search?
25. What is the most accurate beginner-level explanation of linked lists?
26. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
27. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
28. What is the most accurate beginner-level explanation of linked lists? (variation 92)
29. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
30. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
31. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
32. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
33. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
34. A student says 'queues' is not relevant to real projects. What is the best correction?
35. Which statement best describes hash tables in Data Structures & Algorithms?
36. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

37. A student says 'queues' is not relevant to real projects. What is the best correction?
38. Which option is a correct use case for merge sort in Data Structures & Algorithms?
39. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
40. What is the most accurate beginner-level explanation of recursion? (variation 97)
41. When working with Data Structures & Algorithms, why would a developer use binary search?
42. What is the most accurate beginner-level explanation of linked lists? (variation 102)
43. What is the most accurate beginner-level explanation of linked lists?
44. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
45. When working with Data Structures & Algorithms, why would a developer use binary search?
46. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
47. Which statement best describes Big O notation in Data Structures & Algorithms?
48. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
49. What is the most accurate beginner-level explanation of recursion? (variation 87)
50. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
51. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
52. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
53. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
54. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
55. Which statement best describes Big O notation in Data Structures & Algorithms?

56. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

57. What is the most accurate beginner-level explanation of recursion?

58. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)

59. What is the most accurate beginner-level explanation of recursion?

60. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
