

NEET Previous Year Practice 2022 (2022)

Subject: General | Topic: Data Structures & Algorithms

1. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
2. What is the most accurate beginner-level explanation of recursion? (variation 107)
3. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
4. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
5. What is the most accurate beginner-level explanation of linked lists? (variation 92)
6. Which statement best describes Big O notation in Data Structures & Algorithms?
7. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
8. What is the most accurate beginner-level explanation of linked lists? (variation 102)
9. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
10. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
11. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
12. What is the most accurate beginner-level explanation of recursion? (variation 97)
13. What is the most accurate beginner-level explanation of linked lists? (variation 72)
14. What is the most accurate beginner-level explanation of recursion? (variation 87)
15. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
16. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
17. What is the most accurate beginner-level explanation of recursion?

18. What is the most accurate beginner-level explanation of recursion?
19. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
20. A student says 'queues' is not relevant to real projects. What is the best correction?
21. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
22. What is the most accurate beginner-level explanation of linked lists? (variation 82)
23. What is the most accurate beginner-level explanation of linked lists?
24. What is the most accurate beginner-level explanation of linked lists? (variation 92)
25. Which statement best describes hash tables in Data Structures & Algorithms?
26. Which option is a correct use case for merge sort in Data Structures & Algorithms?
27. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
28. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
29. What is the most accurate beginner-level explanation of recursion? (variation 97)
30. Which statement best describes hash tables in Data Structures & Algorithms?
31. When working with Data Structures & Algorithms, why would a developer use binary search?
32. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
33. What is the most accurate beginner-level explanation of linked lists? (variation 102)
34. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
35. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
36. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)

37. When working with Data Structures & Algorithms, why would a developer use binary search?
38. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
39. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
40. Which statement best describes Big O notation in Data Structures & Algorithms?
41. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
42. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
43. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
44. What is the most accurate beginner-level explanation of linked lists? (variation 82)
45. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
46. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
47. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
48. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
49. A student says 'queues' is not relevant to real projects. What is the best correction?
50. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
51. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)
52. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
53. What is the most accurate beginner-level explanation of linked lists?
54. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
55. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

56. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)

57. When working with Data Structures & Algorithms, why would a developer use binary search?

58. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)

59. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

60. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
