

NEET Previous Year Practice 2023 (2023)

Subject: General | Topic: Data Structures & Algorithms

1. What is the most accurate beginner-level explanation of recursion? (variation 77)
2. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
3. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
4. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
5. Which statement best describes hash tables in Data Structures & Algorithms?
6. What is the most accurate beginner-level explanation of recursion? (variation 107)
7. What is the most accurate beginner-level explanation of linked lists? (variation 102)
8. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
9. Which statement best describes hash tables in Data Structures & Algorithms?
10. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
11. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
12. A student says 'queues' is not relevant to real projects. What is the best correction?
13. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
14. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
15. What is the most accurate beginner-level explanation of linked lists? (variation 92)
16. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
17. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

18. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
19. Which option is a correct use case for merge sort in Data Structures & Algorithms?
20. What is the most accurate beginner-level explanation of linked lists?
21. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
22. What is the most accurate beginner-level explanation of linked lists? (variation 72)
23. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
24. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
25. What is the most accurate beginner-level explanation of linked lists? (variation 82)
26. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
27. What is the most accurate beginner-level explanation of linked lists? (variation 102)
28. When working with Data Structures & Algorithms, why would a developer use binary search?
29. When working with Data Structures & Algorithms, why would a developer use binary search?
30. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
31. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
32. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
33. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
34. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
35. What is the most accurate beginner-level explanation of recursion?
36. Which option is a correct use case for merge sort in Data Structures & Algorithms?

37. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
38. What is the most accurate beginner-level explanation of recursion? (variation 97)
39. What is the most accurate beginner-level explanation of linked lists?
40. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
41. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
42. What is the most accurate beginner-level explanation of linked lists? (variation 82)
43. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
44. What is the most accurate beginner-level explanation of linked lists? (variation 72)
45. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
46. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
47. What is the most accurate beginner-level explanation of recursion? (variation 87)
48. Which statement best describes Big O notation in Data Structures & Algorithms?
49. What is the most accurate beginner-level explanation of linked lists?
50. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
51. When working with Data Structures & Algorithms, why would a developer use binary search?
52. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
53. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
54. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)
55. What is the most accurate beginner-level explanation of linked lists? (variation 92)

56. Which statement best describes hash tables in Data Structures & Algorithms?
57. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
58. What is the most accurate beginner-level explanation of recursion?
59. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
60. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
