

NEET Previous Year Practice 2024 (2024)

Subject: General | Topic: Data Structures & Algorithms

1. What is the most accurate beginner-level explanation of recursion?
2. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
3. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
4. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
5. A student says 'queues' is not relevant to real projects. What is the best correction?
6. Which statement best describes Big O notation in Data Structures & Algorithms?
7. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
8. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
9. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
10. What is the most accurate beginner-level explanation of linked lists?
11. What is the most accurate beginner-level explanation of recursion?
12. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
13. What is the most accurate beginner-level explanation of linked lists? (variation 72)
14. What is the most accurate beginner-level explanation of recursion?
15. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
16. What is the most accurate beginner-level explanation of linked lists? (variation 102)
17. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)

18. Which statement best describes hash tables in Data Structures & Algorithms?
19. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
20. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
21. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
22. Which statement best describes Big O notation in Data Structures & Algorithms?
23. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
24. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
25. What is the most accurate beginner-level explanation of linked lists? (variation 82)
26. What is the most accurate beginner-level explanation of linked lists? (variation 92)
27. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
28. What is the most accurate beginner-level explanation of linked lists?
29. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
30. When working with Data Structures & Algorithms, why would a developer use binary search?
31. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
32. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
33. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
34. Which option is a correct use case for stacks in Data Structures & Algorithms?
35. What is the most accurate beginner-level explanation of linked lists? (variation 92)
36. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

37. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
38. What is the most accurate beginner-level explanation of linked lists? (variation 102)
39. When working with Data Structures & Algorithms, why would a developer use binary trees?
40. What is the most accurate beginner-level explanation of recursion? (variation 107)
41. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
42. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
43. What is the most accurate beginner-level explanation of linked lists? (variation 72)
44. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
45. What is the most accurate beginner-level explanation of linked lists?
46. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
47. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
48. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
49. What is the most accurate beginner-level explanation of recursion? (variation 97)
50. What is the most accurate beginner-level explanation of linked lists? (variation 102)
51. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
52. Which statement best describes hash tables in Data Structures & Algorithms?
53. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
54. What is the most accurate beginner-level explanation of recursion? (variation 77)
55. What is the most accurate beginner-level explanation of recursion? (variation 97)

56. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
57. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
58. What is the most accurate beginner-level explanation of linked lists? (variation 92)
59. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
60. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
