

NEET Previous Year Practice 2025 (2025)

Subject: General | Topic: Data Structures & Algorithms

1. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
2. When working with Data Structures & Algorithms, why would a developer use binary search?
3. What is the most accurate beginner-level explanation of linked lists? (variation 92)
4. When working with Data Structures & Algorithms, why would a developer use binary trees?
5. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
6. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
7. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
8. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
9. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
10. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
11. What is the most accurate beginner-level explanation of linked lists? (variation 72)
12. Which option is a correct use case for merge sort in Data Structures & Algorithms?
13. Which statement best describes hash tables in Data Structures & Algorithms?
14. Which statement best describes Big O notation in Data Structures & Algorithms?
15. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
16. Which option is a correct use case for merge sort in Data Structures & Algorithms?
17. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)

18. Which statement best describes hash tables in Data Structures & Algorithms?
19. What is the most accurate beginner-level explanation of recursion? (variation 77)
20. Which statement best describes hash tables in Data Structures & Algorithms?
21. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
22. A student says 'queues' is not relevant to real projects. What is the best correction?
23. A student says 'queues' is not relevant to real projects. What is the best correction?
24. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
25. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)
26. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
27. When working with Data Structures & Algorithms, why would a developer use binary search?
28. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
29. Which option is a correct use case for stacks in Data Structures & Algorithms?
30. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
31. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
32. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
33. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
34. What is the most accurate beginner-level explanation of linked lists?
35. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
36. When working with Data Structures & Algorithms, why would a developer use binary search?

37. What is the most accurate beginner-level explanation of linked lists? (variation 72)
38. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
39. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
40. What is the most accurate beginner-level explanation of linked lists?
41. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
42. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
43. What is the most accurate beginner-level explanation of recursion? (variation 97)
44. What is the most accurate beginner-level explanation of recursion?
45. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
46. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
47. What is the most accurate beginner-level explanation of recursion? (variation 97)
48. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
49. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
50. When working with Data Structures & Algorithms, why would a developer use binary search?
51. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
52. What is the most accurate beginner-level explanation of recursion?
53. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
54. What is the most accurate beginner-level explanation of linked lists?
55. What is the most accurate beginner-level explanation of linked lists? (variation 102)

56. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
57. What is the most accurate beginner-level explanation of linked lists? (variation 92)
58. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
59. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
60. What is the most accurate beginner-level explanation of linked lists? (variation 82)
