

NEET Previous Year Practice 2026 (2026)

Subject: General | Topic: Data Structures & Algorithms

1. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
2. What is the most accurate beginner-level explanation of linked lists?
3. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
4. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
5. What is the most accurate beginner-level explanation of linked lists? (variation 92)
6. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
7. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
8. A student says 'queues' is not relevant to real projects. What is the best correction?
9. What is the most accurate beginner-level explanation of recursion?
10. When working with Data Structures & Algorithms, why would a developer use binary search?
11. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
12. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
13. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
14. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
15. When working with Data Structures & Algorithms, why would a developer use binary search?
16. What is the most accurate beginner-level explanation of recursion? (variation 77)
17. What is the most accurate beginner-level explanation of linked lists? (variation 82)

18. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
19. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
20. A student says 'queues' is not relevant to real projects. What is the best correction?
21. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
22. Which statement best describes hash tables in Data Structures & Algorithms?
23. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
24. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
25. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
26. What is the most accurate beginner-level explanation of linked lists? (variation 102)
27. What is the most accurate beginner-level explanation of recursion?
28. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
29. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
30. Which option is a correct use case for stacks in Data Structures & Algorithms?
31. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
32. Which statement best describes hash tables in Data Structures & Algorithms?
33. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
34. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
35. When working with Data Structures & Algorithms, why would a developer use binary search?
36. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

37. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
38. What is the most accurate beginner-level explanation of linked lists?
39. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
40. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
41. Which statement best describes Big O notation in Data Structures & Algorithms?
42. When working with Data Structures & Algorithms, why would a developer use binary trees?
43. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
44. What is the most accurate beginner-level explanation of linked lists? (variation 72)
45. When working with Data Structures & Algorithms, why would a developer use binary search?
46. When working with Data Structures & Algorithms, why would a developer use binary trees?
47. What is the most accurate beginner-level explanation of linked lists? (variation 72)
48. What is the most accurate beginner-level explanation of linked lists?
49. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
50. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
51. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
52. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
53. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
54. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
55. What is the most accurate beginner-level explanation of recursion? (variation 97)

56. What is the most accurate beginner-level explanation of linked lists? (variation 92)

57. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

58. What is the most accurate beginner-level explanation of linked lists? (variation 102)

59. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

60. What is the most accurate beginner-level explanation of linked lists? (variation 102)
