

UPSC Previous Year Practice 2017 (2017)

Subject: General | Topic: Data Structures & Algorithms

1. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
2. What is the most accurate beginner-level explanation of recursion? (variation 97)
3. When working with Data Structures & Algorithms, why would a developer use binary search?
4. When working with Data Structures & Algorithms, why would a developer use binary search?
5. What is the most accurate beginner-level explanation of recursion?
6. What is the most accurate beginner-level explanation of linked lists? (variation 72)
7. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
8. What is the most accurate beginner-level explanation of recursion? (variation 97)
9. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
10. What is the most accurate beginner-level explanation of linked lists?
11. What is the most accurate beginner-level explanation of linked lists?
12. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
13. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
14. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
15. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
16. Which statement best describes hash tables in Data Structures & Algorithms?
17. Which option is a correct use case for merge sort in Data Structures & Algorithms?

18. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
19. What is the most accurate beginner-level explanation of recursion? (variation 77)
20. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
21. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
22. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
23. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
24. Which statement best describes hash tables in Data Structures & Algorithms?
25. When working with Data Structures & Algorithms, why would a developer use binary search?
26. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
27. What is the most accurate beginner-level explanation of recursion?
28. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
29. A student says 'queues' is not relevant to real projects. What is the best correction?
30. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
31. What is the most accurate beginner-level explanation of linked lists? (variation 72)
32. What is the most accurate beginner-level explanation of linked lists? (variation 92)
33. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
34. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
35. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
36. Which statement best describes Big O notation in Data Structures & Algorithms?

37. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
38. A student says 'queues' is not relevant to real projects. What is the best correction?
39. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
40. What is the most accurate beginner-level explanation of linked lists? (variation 92)
41. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
42. What is the most accurate beginner-level explanation of linked lists?
43. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
44. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
45. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
46. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
47. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
48. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
49. Which option is a correct use case for stacks in Data Structures & Algorithms?
50. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
51. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
52. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
53. Which statement best describes Big O notation in Data Structures & Algorithms?
54. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
55. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)

56. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

57. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

58. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

59. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

60. Which statement best describes hash tables in Data Structures & Algorithms?
