

UPSC Previous Year Practice 2018 (2018)

Subject: General | Topic: Data Structures & Algorithms

1. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
2. What is the most accurate beginner-level explanation of linked lists? (variation 92)
3. A student says 'queues' is not relevant to real projects. What is the best correction?
4. When working with Data Structures & Algorithms, why would a developer use binary trees?
5. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
6. What is the most accurate beginner-level explanation of recursion? (variation 87)
7. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
8. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
9. When working with Data Structures & Algorithms, why would a developer use binary search?
10. What is the most accurate beginner-level explanation of linked lists? (variation 102)
11. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
12. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
13. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
14. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
15. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
16. Which statement best describes Big O notation in Data Structures & Algorithms?
17. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)

18. When working with Data Structures & Algorithms, why would a developer use binary search?
19. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
20. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
21. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
22. What is the most accurate beginner-level explanation of linked lists?
23. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
24. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
25. What is the most accurate beginner-level explanation of linked lists? (variation 72)
26. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
27. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
28. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
29. Which statement best describes hash tables in Data Structures & Algorithms?
30. What is the most accurate beginner-level explanation of linked lists?
31. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
32. What is the most accurate beginner-level explanation of recursion? (variation 97)
33. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
34. When working with Data Structures & Algorithms, why would a developer use binary trees?
35. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
36. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)

37. What is the most accurate beginner-level explanation of recursion?
38. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
39. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
40. Which statement best describes Big O notation in Data Structures & Algorithms?
41. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
42. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
43. What is the most accurate beginner-level explanation of linked lists? (variation 92)
44. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
45. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
46. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
47. A student says 'queues' is not relevant to real projects. What is the best correction?
48. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
49. What is the most accurate beginner-level explanation of linked lists? (variation 92)
50. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
51. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
52. When working with Data Structures & Algorithms, why would a developer use binary search?
53. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
54. What is the most accurate beginner-level explanation of recursion? (variation 77)
55. What is the most accurate beginner-level explanation of recursion? (variation 107)

56. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
57. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
58. Which option is a correct use case for stacks in Data Structures & Algorithms?
59. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
60. What is the most accurate beginner-level explanation of linked lists? (variation 82)
