

UPSC Previous Year Practice 2020 (2020)

Subject: General | Topic: Data Structures & Algorithms

1. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
2. What is the most accurate beginner-level explanation of linked lists? (variation 82)
3. What is the most accurate beginner-level explanation of linked lists? (variation 92)
4. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
5. What is the most accurate beginner-level explanation of linked lists?
6. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
7. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
8. A student says 'queues' is not relevant to real projects. What is the best correction?
9. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
10. A student says 'queues' is not relevant to real projects. What is the best correction?
11. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
12. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
13. Which statement best describes Big O notation in Data Structures & Algorithms?
14. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
15. What is the most accurate beginner-level explanation of linked lists? (variation 72)
16. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
17. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

18. When working with Data Structures & Algorithms, why would a developer use binary trees?
19. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
20. What is the most accurate beginner-level explanation of recursion? (variation 97)
21. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
22. When working with Data Structures & Algorithms, why would a developer use binary trees?
23. What is the most accurate beginner-level explanation of recursion?
24. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
25. What is the most accurate beginner-level explanation of recursion? (variation 77)
26. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
27. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
28. What is the most accurate beginner-level explanation of recursion? (variation 87)
29. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
30. When working with Data Structures & Algorithms, why would a developer use binary search?
31. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
32. What is the most accurate beginner-level explanation of linked lists? (variation 102)
33. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
34. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
35. Which statement best describes hash tables in Data Structures & Algorithms?
36. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

37. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
38. What is the most accurate beginner-level explanation of recursion?
39. What is the most accurate beginner-level explanation of recursion?
40. Which statement best describes hash tables in Data Structures & Algorithms?
41. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
42. What is the most accurate beginner-level explanation of linked lists? (variation 102)
43. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
44. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
45. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
46. Which option is a correct use case for merge sort in Data Structures & Algorithms?
47. What is the most accurate beginner-level explanation of linked lists?
48. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
49. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
50. Which option is a correct use case for merge sort in Data Structures & Algorithms?
51. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
52. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
53. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
54. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
55. What is the most accurate beginner-level explanation of linked lists? (variation 102)

56. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

57. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

58. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

59. What is the most accurate beginner-level explanation of linked lists? (variation 92)

60. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
