

UPSC Previous Year Practice 2021 (2021)

Subject: General | Topic: Data Structures & Algorithms

1. When working with Data Structures & Algorithms, why would a developer use binary search?
2. What is the most accurate beginner-level explanation of linked lists? (variation 92)
3. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
4. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
5. What is the most accurate beginner-level explanation of recursion? (variation 87)
6. Which option is a correct use case for merge sort in Data Structures & Algorithms?
7. A student says 'queues' is not relevant to real projects. What is the best correction?
8. What is the most accurate beginner-level explanation of linked lists?
9. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
10. Which statement best describes hash tables in Data Structures & Algorithms?
11. What is the most accurate beginner-level explanation of recursion?
12. What is the most accurate beginner-level explanation of linked lists? (variation 82)
13. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
14. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
15. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
16. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
17. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

18. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
19. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
20. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
21. What is the most accurate beginner-level explanation of recursion?
22. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
23. Which statement best describes hash tables in Data Structures & Algorithms?
24. When working with Data Structures & Algorithms, why would a developer use binary search?
25. What is the most accurate beginner-level explanation of linked lists? (variation 92)
26. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
27. What is the most accurate beginner-level explanation of linked lists? (variation 82)
28. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
29. What is the most accurate beginner-level explanation of linked lists? (variation 72)
30. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
31. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
32. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
33. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
34. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
35. When working with Data Structures & Algorithms, why would a developer use binary search?
36. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)

37. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
38. When working with Data Structures & Algorithms, why would a developer use binary trees?
39. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
40. What is the most accurate beginner-level explanation of recursion?
41. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
42. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
43. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
44. What is the most accurate beginner-level explanation of recursion? (variation 97)
45. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)
46. What is the most accurate beginner-level explanation of linked lists? (variation 102)
47. What is the most accurate beginner-level explanation of linked lists? (variation 102)
48. A student says 'queues' is not relevant to real projects. What is the best correction?
49. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
50. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
51. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
52. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
53. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
54. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
55. Which option is a correct use case for stacks in Data Structures & Algorithms?

56. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)

57. What is the most accurate beginner-level explanation of linked lists?

58. What is the most accurate beginner-level explanation of recursion? (variation 97)

59. What is the most accurate beginner-level explanation of linked lists? (variation 92)

60. When working with Data Structures & Algorithms, why would a developer use binary search?
