

UPSC Previous Year Practice 2022 (2022)

Subject: General | Topic: Data Structures & Algorithms

1. When working with Data Structures & Algorithms, why would a developer use binary search?
2. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
3. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
4. Which statement best describes Big O notation in Data Structures & Algorithms?
5. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
6. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
7. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
8. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
9. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
10. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
11. When working with Data Structures & Algorithms, why would a developer use binary trees?
12. What is the most accurate beginner-level explanation of linked lists?
13. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
14. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
15. Which statement best describes hash tables in Data Structures & Algorithms?
16. A student says 'queues' is not relevant to real projects. What is the best correction?
17. Which statement best describes hash tables in Data Structures & Algorithms?

18. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
19. Which option is a correct use case for stacks in Data Structures & Algorithms?
20. What is the most accurate beginner-level explanation of linked lists? (variation 102)
21. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
22. What is the most accurate beginner-level explanation of recursion? (variation 87)
23. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
24. When working with Data Structures & Algorithms, why would a developer use binary search?
25. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
26. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
27. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
28. What is the most accurate beginner-level explanation of linked lists? (variation 72)
29. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
30. Which statement best describes hash tables in Data Structures & Algorithms?
31. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
32. What is the most accurate beginner-level explanation of recursion? (variation 97)
33. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
34. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
35. Which statement best describes Big O notation in Data Structures & Algorithms?
36. What is the most accurate beginner-level explanation of recursion? (variation 77)

37. When working with Data Structures & Algorithms, why would a developer use binary search?
38. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
39. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
40. What is the most accurate beginner-level explanation of linked lists? (variation 92)
41. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
42. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
43. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
44. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
45. What is the most accurate beginner-level explanation of recursion? (variation 97)
46. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
47. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
48. A student says 'queues' is not relevant to real projects. What is the best correction?
49. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
50. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
51. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
52. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
53. When working with Data Structures & Algorithms, why would a developer use binary search?
54. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
55. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

56. What is the most accurate beginner-level explanation of recursion?
57. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
58. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
59. What is the most accurate beginner-level explanation of linked lists? (variation 72)
60. What is the most accurate beginner-level explanation of recursion? (variation 107)
