

UPSC Previous Year Practice 2023 (2023)

Subject: General | Topic: Data Structures & Algorithms

1. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
2. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
3. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
4. What is the most accurate beginner-level explanation of linked lists? (variation 102)
5. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
6. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
7. What is the most accurate beginner-level explanation of linked lists? (variation 72)
8. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
9. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
10. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
11. Which option is a correct use case for merge sort in Data Structures & Algorithms?
12. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
13. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
14. Which option is a correct use case for stacks in Data Structures & Algorithms?
15. A student says 'queues' is not relevant to real projects. What is the best correction?
16. What is the most accurate beginner-level explanation of recursion? (variation 107)
17. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

18. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
19. What is the most accurate beginner-level explanation of linked lists? (variation 102)
20. What is the most accurate beginner-level explanation of linked lists? (variation 92)
21. Which statement best describes Big O notation in Data Structures & Algorithms?
22. When working with Data Structures & Algorithms, why would a developer use binary trees?
23. What is the most accurate beginner-level explanation of recursion? (variation 97)
24. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
25. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
26. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
27. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
28. What is the most accurate beginner-level explanation of recursion? (variation 97)
29. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
30. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
31. When working with Data Structures & Algorithms, why would a developer use binary search?
32. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
33. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
34. When working with Data Structures & Algorithms, why would a developer use binary search?
35. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
36. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

37. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
38. When working with Data Structures & Algorithms, why would a developer use binary trees?
39. What is the most accurate beginner-level explanation of recursion? (variation 87)
40. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
41. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
42. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
43. What is the most accurate beginner-level explanation of linked lists?
44. What is the most accurate beginner-level explanation of recursion?
45. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
46. What is the most accurate beginner-level explanation of linked lists? (variation 82)
47. What is the most accurate beginner-level explanation of linked lists? (variation 82)
48. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
49. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
50. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
51. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
52. What is the most accurate beginner-level explanation of recursion? (variation 77)
53. What is the most accurate beginner-level explanation of recursion?
54. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
55. Which statement best describes hash tables in Data Structures & Algorithms?

56. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)

57. Which option is a correct use case for merge sort in Data Structures & Algorithms?

58. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)

59. What is the most accurate beginner-level explanation of recursion?

60. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
