

UPSC Previous Year Practice 2024 (2024)

Subject: General | Topic: Data Structures & Algorithms

1. What is the most accurate beginner-level explanation of linked lists?
2. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)
3. What is the most accurate beginner-level explanation of recursion? (variation 97)
4. A student says 'queues' is not relevant to real projects. What is the best correction?
5. What is the most accurate beginner-level explanation of linked lists?
6. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
7. What is the most accurate beginner-level explanation of linked lists? (variation 92)
8. When working with Data Structures & Algorithms, why would a developer use binary search?
9. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
10. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
11. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
12. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
13. When working with Data Structures & Algorithms, why would a developer use binary search?
14. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
15. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
16. When working with Data Structures & Algorithms, why would a developer use binary trees?
17. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)

18. What is the most accurate beginner-level explanation of recursion? (variation 77)
19. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
20. What is the most accurate beginner-level explanation of recursion?
21. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
22. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
23. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
24. Which option is a correct use case for merge sort in Data Structures & Algorithms?
25. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
26. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
27. What is the most accurate beginner-level explanation of recursion? (variation 97)
28. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
29. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
30. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
31. Which statement best describes hash tables in Data Structures & Algorithms?
32. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
33. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
34. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
35. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
36. What is the most accurate beginner-level explanation of linked lists? (variation 72)

37. When working with Data Structures & Algorithms, why would a developer use binary search?
38. Which statement best describes Big O notation in Data Structures & Algorithms?
39. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
40. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
41. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
42. What is the most accurate beginner-level explanation of linked lists? (variation 82)
43. What is the most accurate beginner-level explanation of linked lists? (variation 102)
44. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
45. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
46. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
47. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
48. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
49. When working with Data Structures & Algorithms, why would a developer use binary search?
50. What is the most accurate beginner-level explanation of linked lists? (variation 82)
51. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
52. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
53. When working with Data Structures & Algorithms, why would a developer use binary trees?
54. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
55. Which statement best describes hash tables in Data Structures & Algorithms?

56. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

57. Which option is a correct use case for stacks in Data Structures & Algorithms?

58. What is the most accurate beginner-level explanation of recursion? (variation 87)

59. What is the most accurate beginner-level explanation of recursion? (variation 107)

60. What is the most accurate beginner-level explanation of recursion?
