

UPSC Previous Year Practice 2025 (2025)

Subject: General | Topic: Data Structures & Algorithms

1. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
2. What is the most accurate beginner-level explanation of recursion? (variation 87)
3. A student says 'queues' is not relevant to real projects. What is the best correction?
4. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
5. What is the most accurate beginner-level explanation of recursion?
6. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
7. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
8. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
9. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
10. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
11. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
12. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
13. What is the most accurate beginner-level explanation of recursion? (variation 97)
14. What is the most accurate beginner-level explanation of linked lists? (variation 92)
15. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
16. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
17. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

18. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
19. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
20. Which option is a correct use case for merge sort in Data Structures & Algorithms?
21. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
22. What is the most accurate beginner-level explanation of linked lists? (variation 102)
23. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
24. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
25. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
26. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
27. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
28. What is the most accurate beginner-level explanation of linked lists? (variation 82)
29. What is the most accurate beginner-level explanation of linked lists? (variation 102)
30. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
31. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
32. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
33. What is the most accurate beginner-level explanation of linked lists? (variation 72)
34. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
35. What is the most accurate beginner-level explanation of linked lists?
36. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

37. When working with Data Structures & Algorithms, why would a developer use binary trees?
38. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
39. What is the most accurate beginner-level explanation of recursion? (variation 77)
40. What is the most accurate beginner-level explanation of linked lists? (variation 92)
41. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
42. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
43. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
44. Which statement best describes hash tables in Data Structures & Algorithms?
45. What is the most accurate beginner-level explanation of linked lists? (variation 72)
46. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
47. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
48. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
49. When working with Data Structures & Algorithms, why would a developer use binary search?
50. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
51. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
52. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
53. When working with Data Structures & Algorithms, why would a developer use binary search?
54. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
55. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)

56. Which option is a correct use case for merge sort in Data Structures & Algorithms?

57. What is the most accurate beginner-level explanation of recursion? (variation 107)

58. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

59. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)

60. When working with Data Structures & Algorithms, why would a developer use binary search?
