

UPSC Previous Year Practice 2026 (2026)

Subject: General | Topic: Data Structures & Algorithms

1. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
2. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
3. A student says 'queues' is not relevant to real projects. What is the best correction?
4. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
5. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
6. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
7. What is the most accurate beginner-level explanation of recursion?
8. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
9. What is the most accurate beginner-level explanation of recursion? (variation 87)
10. What is the most accurate beginner-level explanation of linked lists?
11. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
12. Which statement best describes hash tables in Data Structures & Algorithms?
13. What is the most accurate beginner-level explanation of linked lists? (variation 72)
14. When working with Data Structures & Algorithms, why would a developer use binary trees?
15. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
16. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
17. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

18. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
19. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
20. When working with Data Structures & Algorithms, why would a developer use binary search?
21. What is the most accurate beginner-level explanation of linked lists? (variation 102)
22. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
23. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
24. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
25. Which option is a correct use case for merge sort in Data Structures & Algorithms?
26. What is the most accurate beginner-level explanation of linked lists? (variation 82)
27. What is the most accurate beginner-level explanation of recursion?
28. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
29. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)
30. What is the most accurate beginner-level explanation of linked lists? (variation 92)
31. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
32. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
33. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
34. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
35. What is the most accurate beginner-level explanation of recursion?
36. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)

37. What is the most accurate beginner-level explanation of recursion? (variation 107)
38. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
39. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
40. When working with Data Structures & Algorithms, why would a developer use binary search?
41. Which statement best describes hash tables in Data Structures & Algorithms?
42. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
43. What is the most accurate beginner-level explanation of linked lists?
44. A student says 'queues' is not relevant to real projects. What is the best correction?
45. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
46. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
47. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
48. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
49. Which statement best describes hash tables in Data Structures & Algorithms?
50. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
51. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
52. What is the most accurate beginner-level explanation of recursion? (variation 97)
53. Which option is a correct use case for merge sort in Data Structures & Algorithms?
54. Which statement best describes Big O notation in Data Structures & Algorithms?
55. What is the most accurate beginner-level explanation of linked lists? (variation 82)

56. What is the most accurate beginner-level explanation of linked lists?

57. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

58. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

59. What is the most accurate beginner-level explanation of linked lists? (variation 102)

60. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
