

University Exams Previous Year Practice 2017 (2017)

Subject: General | Topic: Data Structures & Algorithms

1. What is the most accurate beginner-level explanation of recursion? (variation 77)
2. When working with Data Structures & Algorithms, why would a developer use binary trees?
3. When working with Data Structures & Algorithms, why would a developer use binary search?
4. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
5. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
6. Which option is a correct use case for stacks in Data Structures & Algorithms?
7. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
8. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
9. A student says 'queues' is not relevant to real projects. What is the best correction?
10. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
11. What is the most accurate beginner-level explanation of recursion?
12. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
13. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
14. What is the most accurate beginner-level explanation of linked lists? (variation 92)
15. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
16. What is the most accurate beginner-level explanation of linked lists? (variation 102)
17. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

18. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
19. What is the most accurate beginner-level explanation of linked lists? (variation 72)
20. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
21. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
22. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
23. What is the most accurate beginner-level explanation of recursion? (variation 97)
24. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
25. What is the most accurate beginner-level explanation of linked lists?
26. Which statement best describes hash tables in Data Structures & Algorithms?
27. What is the most accurate beginner-level explanation of linked lists? (variation 92)
28. Which statement best describes hash tables in Data Structures & Algorithms?
29. When working with Data Structures & Algorithms, why would a developer use binary search?
30. Which option is a correct use case for merge sort in Data Structures & Algorithms?
31. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
32. Which statement best describes hash tables in Data Structures & Algorithms?
33. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
34. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
35. A student says 'queues' is not relevant to real projects. What is the best correction?
36. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

37. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
38. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
39. What is the most accurate beginner-level explanation of linked lists?
40. What is the most accurate beginner-level explanation of recursion?
41. When working with Data Structures & Algorithms, why would a developer use binary search?
42. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
43. Which option is a correct use case for merge sort in Data Structures & Algorithms?
44. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
45. When working with Data Structures & Algorithms, why would a developer use binary trees?
46. What is the most accurate beginner-level explanation of linked lists? (variation 82)
47. What is the most accurate beginner-level explanation of recursion?
48. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
49. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
50. When working with Data Structures & Algorithms, why would a developer use binary search?
51. What is the most accurate beginner-level explanation of linked lists? (variation 92)
52. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
53. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
54. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
55. What is the most accurate beginner-level explanation of linked lists? (variation 102)

56. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)

57. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)

58. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

59. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)

60. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
