

University Exams Previous Year Practice 2018 (2018)

Subject: General | Topic: Data Structures & Algorithms

1. Which option is a correct use case for merge sort in Data Structures & Algorithms?
2. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
3. What is the most accurate beginner-level explanation of recursion?
4. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
5. What is the most accurate beginner-level explanation of linked lists? (variation 102)
6. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
7. When working with Data Structures & Algorithms, why would a developer use binary search?
8. What is the most accurate beginner-level explanation of recursion? (variation 87)
9. What is the most accurate beginner-level explanation of linked lists? (variation 102)
10. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
11. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
12. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
13. When working with Data Structures & Algorithms, why would a developer use binary trees?
14. What is the most accurate beginner-level explanation of linked lists? (variation 102)
15. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
16. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
17. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

18. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
19. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
20. A student says 'queues' is not relevant to real projects. What is the best correction?
21. Which option is a correct use case for merge sort in Data Structures & Algorithms?
22. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
23. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
24. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
25. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
26. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
27. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
28. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
29. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
30. Which statement best describes Big O notation in Data Structures & Algorithms?
31. Which statement best describes hash tables in Data Structures & Algorithms?
32. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
33. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)
34. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
35. What is the most accurate beginner-level explanation of linked lists? (variation 92)
36. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

37. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
38. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
39. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
40. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
41. What is the most accurate beginner-level explanation of linked lists? (variation 82)
42. Which statement best describes Big O notation in Data Structures & Algorithms?
43. What is the most accurate beginner-level explanation of recursion?
44. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
45. What is the most accurate beginner-level explanation of recursion? (variation 107)
46. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
47. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
48. Which statement best describes hash tables in Data Structures & Algorithms?
49. What is the most accurate beginner-level explanation of recursion? (variation 97)
50. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
51. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
52. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
53. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
54. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
55. What is the most accurate beginner-level explanation of recursion? (variation 97)

56. What is the most accurate beginner-level explanation of linked lists? (variation 72)

57. What is the most accurate beginner-level explanation of linked lists?

58. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

59. What is the most accurate beginner-level explanation of linked lists?

60. What is the most accurate beginner-level explanation of linked lists? (variation 82)
