

University Exams Previous Year Practice 2021 (2021)

Subject: General | Topic: Data Structures & Algorithms

1. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
2. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
3. Which statement best describes hash tables in Data Structures & Algorithms?
4. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
5. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
6. What is the most accurate beginner-level explanation of recursion?
7. What is the most accurate beginner-level explanation of linked lists? (variation 92)
8. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
9. What is the most accurate beginner-level explanation of linked lists? (variation 92)
10. Which statement best describes hash tables in Data Structures & Algorithms?
11. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
12. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
13. What is the most accurate beginner-level explanation of linked lists? (variation 92)
14. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
15. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
16. Which statement best describes hash tables in Data Structures & Algorithms?
17. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

18. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
19. When working with Data Structures & Algorithms, why would a developer use binary search?
20. What is the most accurate beginner-level explanation of linked lists? (variation 72)
21. What is the most accurate beginner-level explanation of linked lists? (variation 102)
22. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
23. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
24. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
25. Which statement best describes Big O notation in Data Structures & Algorithms?
26. What is the most accurate beginner-level explanation of linked lists?
27. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
28. What is the most accurate beginner-level explanation of linked lists? (variation 102)
29. What is the most accurate beginner-level explanation of linked lists? (variation 72)
30. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
31. What is the most accurate beginner-level explanation of linked lists? (variation 82)
32. When working with Data Structures & Algorithms, why would a developer use binary search?
33. What is the most accurate beginner-level explanation of recursion?
34. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
35. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
36. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

37. What is the most accurate beginner-level explanation of recursion?
38. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
39. What is the most accurate beginner-level explanation of recursion? (variation 97)
40. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)
41. What is the most accurate beginner-level explanation of recursion? (variation 77)
42. What is the most accurate beginner-level explanation of linked lists?
43. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
44. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
45. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
46. What is the most accurate beginner-level explanation of linked lists? (variation 102)
47. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
48. What is the most accurate beginner-level explanation of linked lists? (variation 82)
49. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
50. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
51. A student says 'queues' is not relevant to real projects. What is the best correction?
52. What is the most accurate beginner-level explanation of recursion? (variation 87)
53. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
54. When working with Data Structures & Algorithms, why would a developer use binary search?
55. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)

56. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

57. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)

58. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)

59. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)

60. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
