

University Exams Previous Year Practice 2022 (2022)

Subject: General | Topic: Data Structures & Algorithms

1. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
2. Which statement best describes hash tables in Data Structures & Algorithms?
3. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
4. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
5. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
6. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
7. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
8. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
9. What is the most accurate beginner-level explanation of recursion? (variation 97)
10. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
11. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
12. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
13. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
14. Which statement best describes Big O notation in Data Structures & Algorithms?
15. When working with Data Structures & Algorithms, why would a developer use binary search?
16. Which option is a correct use case for merge sort in Data Structures & Algorithms?
17. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)

18. What is the most accurate beginner-level explanation of recursion? (variation 87)
19. Which statement best describes Big O notation in Data Structures & Algorithms?
20. What is the most accurate beginner-level explanation of recursion? (variation 107)
21. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
22. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
23. When working with Data Structures & Algorithms, why would a developer use binary trees?
24. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
25. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
26. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
27. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
28. What is the most accurate beginner-level explanation of linked lists? (variation 92)
29. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
30. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
31. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
32. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
33. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
34. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
35. A student says 'queues' is not relevant to real projects. What is the best correction?
36. When working with Data Structures & Algorithms, why would a developer use binary search?

37. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
38. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
39. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
40. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
41. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
42. Which statement best describes hash tables in Data Structures & Algorithms?
43. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
44. What is the most accurate beginner-level explanation of linked lists? (variation 102)
45. What is the most accurate beginner-level explanation of linked lists? (variation 92)
46. What is the most accurate beginner-level explanation of linked lists?
47. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
48. What is the most accurate beginner-level explanation of linked lists?
49. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
50. What is the most accurate beginner-level explanation of recursion?
51. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
52. When working with Data Structures & Algorithms, why would a developer use binary search?
53. What is the most accurate beginner-level explanation of recursion?
54. What is the most accurate beginner-level explanation of linked lists? (variation 72)
55. Which option is a correct use case for stacks in Data Structures & Algorithms?

56. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

57. What is the most accurate beginner-level explanation of recursion?

58. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

59. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

60. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
