

University Exams Previous Year Practice 2024 (2024)

Subject: General | Topic: Data Structures & Algorithms

1. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
2. What is the most accurate beginner-level explanation of recursion? (variation 77)
3. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
4. A student says 'queues' is not relevant to real projects. What is the best correction?
5. What is the most accurate beginner-level explanation of recursion?
6. What is the most accurate beginner-level explanation of linked lists? (variation 92)
7. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
8. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
9. When working with Data Structures & Algorithms, why would a developer use binary trees?
10. What is the most accurate beginner-level explanation of recursion? (variation 107)
11. What is the most accurate beginner-level explanation of linked lists? (variation 72)
12. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
13. What is the most accurate beginner-level explanation of recursion?
14. What is the most accurate beginner-level explanation of linked lists? (variation 82)
15. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
16. When working with Data Structures & Algorithms, why would a developer use binary search?
17. What is the most accurate beginner-level explanation of recursion? (variation 97)

18. What is the most accurate beginner-level explanation of linked lists?
19. What is the most accurate beginner-level explanation of linked lists? (variation 102)
20. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
21. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
22. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
23. Which option is a correct use case for merge sort in Data Structures & Algorithms?
24. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
25. When working with Data Structures & Algorithms, why would a developer use binary search?
26. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
27. Which statement best describes Big O notation in Data Structures & Algorithms?
28. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
29. When working with Data Structures & Algorithms, why would a developer use binary search?
30. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
31. When working with Data Structures & Algorithms, why would a developer use binary search?
32. What is the most accurate beginner-level explanation of linked lists? (variation 92)
33. What is the most accurate beginner-level explanation of linked lists?
34. What is the most accurate beginner-level explanation of recursion? (variation 97)
35. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
36. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)

37. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
38. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
39. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
40. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
41. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
42. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
43. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
44. Which statement best describes hash tables in Data Structures & Algorithms?
45. Which statement best describes hash tables in Data Structures & Algorithms?
46. What is the most accurate beginner-level explanation of recursion?
47. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
48. A student says 'queues' is not relevant to real projects. What is the best correction?
49. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
50. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
51. What is the most accurate beginner-level explanation of linked lists? (variation 102)
52. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
53. When working with Data Structures & Algorithms, why would a developer use binary trees?
54. Which option is a correct use case for merge sort in Data Structures & Algorithms?
55. What is the most accurate beginner-level explanation of recursion? (variation 87)

56. What is the most accurate beginner-level explanation of linked lists? (variation 92)
57. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
58. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
59. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
60. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
