

University Exams Previous Year Practice 2025 (2025)

Subject: General | Topic: Data Structures & Algorithms

1. What is the most accurate beginner-level explanation of linked lists? (variation 102)
2. What is the most accurate beginner-level explanation of recursion?
3. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
4. Which option is a correct use case for merge sort in Data Structures & Algorithms?
5. What is the most accurate beginner-level explanation of recursion? (variation 87)
6. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
7. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
8. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
9. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
10. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
11. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
12. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
13. When working with Data Structures & Algorithms, why would a developer use binary search?
14. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
15. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
16. What is the most accurate beginner-level explanation of recursion? (variation 97)
17. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)

18. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
19. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
20. Which option is a correct use case for merge sort in Data Structures & Algorithms?
21. What is the most accurate beginner-level explanation of linked lists? (variation 92)
22. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
23. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
24. Which statement best describes hash tables in Data Structures & Algorithms?
25. What is the most accurate beginner-level explanation of linked lists? (variation 72)
26. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
27. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
28. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
29. Which statement best describes Big O notation in Data Structures & Algorithms?
30. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
31. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
32. What is the most accurate beginner-level explanation of linked lists?
33. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
34. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
35. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
36. What is the most accurate beginner-level explanation of recursion? (variation 107)

37. Which statement best describes hash tables in Data Structures & Algorithms?
38. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
39. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
40. A student says 'queues' is not relevant to real projects. What is the best correction?
41. Which option is a correct use case for stacks in Data Structures & Algorithms?
42. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
43. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
44. What is the most accurate beginner-level explanation of recursion? (variation 77)
45. What is the most accurate beginner-level explanation of linked lists? (variation 82)
46. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
47. What is the most accurate beginner-level explanation of linked lists? (variation 102)
48. When working with Data Structures & Algorithms, why would a developer use binary trees?
49. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
50. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
51. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
52. When working with Data Structures & Algorithms, why would a developer use binary trees?
53. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
54. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
55. When working with Data Structures & Algorithms, why would a developer use binary search?

56. What is the most accurate beginner-level explanation of recursion?

57. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)

58. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)

59. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)

60. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
