

University Exams Previous Year Practice 2026 (2026)

Subject: General | Topic: Data Structures & Algorithms

1. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
2. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
3. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
4. What is the most accurate beginner-level explanation of linked lists?
5. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
6. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
7. What is the most accurate beginner-level explanation of linked lists? (variation 102)
8. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
9. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
10. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
11. What is the most accurate beginner-level explanation of recursion? (variation 97)
12. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
13. When working with Data Structures & Algorithms, why would a developer use binary search?
14. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
15. Which statement best describes Big O notation in Data Structures & Algorithms?
16. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
17. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

18. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
19. What is the most accurate beginner-level explanation of recursion?
20. When working with Data Structures & Algorithms, why would a developer use binary trees?
21. Which option is a correct use case for merge sort in Data Structures & Algorithms?
22. Which statement best describes hash tables in Data Structures & Algorithms?
23. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
24. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
25. What is the most accurate beginner-level explanation of recursion? (variation 107)
26. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
27. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
28. What is the most accurate beginner-level explanation of recursion? (variation 77)
29. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
30. What is the most accurate beginner-level explanation of recursion? (variation 97)
31. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
32. What is the most accurate beginner-level explanation of linked lists? (variation 92)
33. What is the most accurate beginner-level explanation of linked lists? (variation 82)
34. Which statement best describes hash tables in Data Structures & Algorithms?
35. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
36. A student says 'queues' is not relevant to real projects. What is the best correction?

37. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
38. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
39. What is the most accurate beginner-level explanation of recursion?
40. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
41. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
42. Which option is a correct use case for merge sort in Data Structures & Algorithms?
43. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
44. Which option is a correct use case for stacks in Data Structures & Algorithms?
45. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
46. Which statement best describes hash tables in Data Structures & Algorithms?
47. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
48. What is the most accurate beginner-level explanation of linked lists? (variation 92)
49. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
50. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
51. What is the most accurate beginner-level explanation of linked lists? (variation 102)
52. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
53. What is the most accurate beginner-level explanation of linked lists?
54. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
55. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)

56. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)

57. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)

58. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)

59. What is the most accurate beginner-level explanation of linked lists? (variation 82)

60. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
